Projects

- CUH Student Portal (Web App) | [View](#)**
 - A student portal for students of Central University of Haryana where every student will get his data and record of complete graduation in segregated way. Made using **Reactjs, Material UI, JavaScript**.
 - Features include login or signup in the portal. Academic Data, Examination Data, Hostel Data, Student's Personal Profile section will get displayed on login for a particular student.
- Medical Appointment Scheduler (Web App) | [View](#)**
 - A website for scheduling and managing medical appointments for doctors and patients using **HTML, CSS, JavaScript and Bootstrap**.
 - Two roles have been added. Doctor and Patient. Doctors can manage the appointments according to their availability and patients can schedule the appointments.
 - Both, Doctor as well as Patients can see their personal profiles along with previous records and appointments. It also shows the facilities and motive that the organization is providing.

Academic and Extracurricular Activities

- Zonal level debate competition.**
- 5★ in C++ and 4★ in Python on Hacker Rank.
- Conducted **intra university web development coding competition**.
